

BANTAM[®] S-888B

general specifications
hydraulic rough terrain crane — 33 ton capacity

General Dimensions

Note: Dimensions given assume boom is fully retracted in travel position and crane is equipped with standard tires.

Operating Weight

WEIGHT

55,950 lbs with 81' boom, main winch only and 4,300 lb. counterweight.

WEIGHT DISTRIBUTION

	Front lbs	Rear lbs	Total lbs
Standard Machine	29,610	26,340	55,950
Add: 32' Jib	+ 1,520	- 620	+ 900
Add: 49' Jib	+ 1,660	- 460	+ 1,200
Add: Auxiliary Winch ..	- 10	+ 110	+ 100
Add: 23:50 x 25 Tires ...	+ 210	+ 210	+ 420

MAXIMUM PERMISSIBLE LOAD IN LBS							
Line Parts	1	2	3	4	5	6	7
Main Hoist	9,500	19,000	28,500	38,000	47,500	57,000	66,000
Aux. Hoist	5,000	10,000	15,000	20,000	25,000	30,000	35,000
Boom Head	2	2-D	2-3	1-2-D	1-2-3	1-2-3-D	1-2-3-4
Hook Block	D	2	2-D	1-2	1-2-D	1-2-3	1-2-3-D

Main Hoist Line - 5/8" Dia. 6x19 IWRC, IPS, Reg. Lay Preformed Wire Rope.
 Minimum Breaking Strength - 17.9 Tons.
 Max. Permissible Line Pull - 10,228 Lbs.

Aux. Hoist Line - 1/2" Dia. 6x19 IWRC, IPS, Preformed Wire Rope.
 Minimum Breaking Strength - 11.5 Tons.
 Max. Permissible Line Pull - 5,265 Lbs.

- For boom lengths less than maximum with the side stow jib erected, the rated loads are determined by boom angle only in the appropriate jib plus boom column. For boom angles not shown, use the capacity of the next lower boom angle.
- When lifting off main boom head and jib is erected, deduct 1800 lbs. for side stow jib from main boom load chart capacities.

CAUTION
 Without outriggers, never maneuver boom beyond 70' radius over front or 40' radius over side to ensure stability.

Range Diagram

GENERAL AND SPECIFIC CAPACITY CONDITIONS AND LIMITATIONS

1. The rated loads as determined by boom length, radius or boom angle pertain to this crane as originally manufactured and equipped. They are maximum load ratings.

2. Crane load ratings are based on freely suspended loads with the machine leveled and standing on a firm, uniform, supporting surface. Practical working loads require the USER to make due allowances for the particular job conditions dependent upon supporting surface, wind, pendulum action of load, jerking or sudden stopping of loads, hazardous surroundings, experience of personnel, etc. Positioning of, or operation at, radii and boom or jib length beyond the maximum and minimum shown is not intended or approved. For boom lengths not shown, use load ratings of next longer boom. **SIDE PULL ON BOOM IS EXTREMELY DANGEROUS.**

3. Weight of hooks, hook blocks, slings and all other load handling devices, except hoist rope, shall be included as part of the load.

4. Chart ratings shown above the bold line or as specified are based on the machine's structural strength and not on the machine's stability. All other ratings are based on stability and do not exceed the specified percentage of tipping load.

5. CRANE LOAD RATINGS ON OUTRIGGERS ARE BASED ON OUTRIGGERS ALL BEING FULLY EXTENDED AND SET ON A FIRM SUPPORTING SURFACE TO PROVIDE FOR A LEVEL MACHINE.

6. This crane and rated loads shown are in accordance with standards of Power Crane And Shovel Association Standard No. 2 and SAE Crane Load Stability Test Code J-765.

7. The operator and other personnel should read and fully understand the Operator's Manual furnished by the manufacturer before operating this machine and rules for safe operation of equipment should be adhered to at all times. Operators and supervisors must fully understand safety standards for mobile hydraulic cranes ANSI B30.15 and be familiar with Federal, State and Local Safety Regulations.

8. The maximum load which may be telescoped is limited by boom angle, hydraulic pressure, boom lubrication, etc. When extending boom with load, do not exceed load rating at longest boom length required.

9. For clamshell, magnet, or concrete bucket operation, weight of bucket or magnet and load must not exceed 90% of load rating chart capacities.

27-1/2 TON CAPACITY (25 METRIC TON CAPACITY)

Lift Capacity

RECOMMENDED TIRE PRESSURE (PSI)			
WORK CONDITION	18x25-20 PR	23.5x25-20 PR	26.5x25-20 PR
LIFT, ON TIRES	85	70	60
ROADING*	60	50	45

*For improved tire wear, do not lift "On Tires" with these inflation pressures

CAUTION
Without outriggers, never maneuver boom beyond 70' radius over front or 40' radius over side to ensure stability.
